

## HOW TO E-CLEAN K8 MACHINE

**“E-CLEAN a minimum of every 2 weeks or twice a month”.**

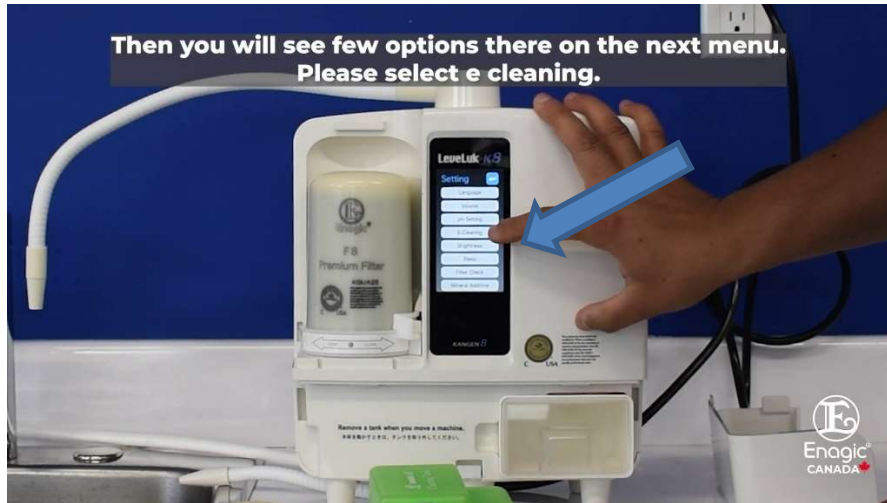

- Things You Need:  
E-Cleaning Powder  
Discharge Plug  
Cleaning tank

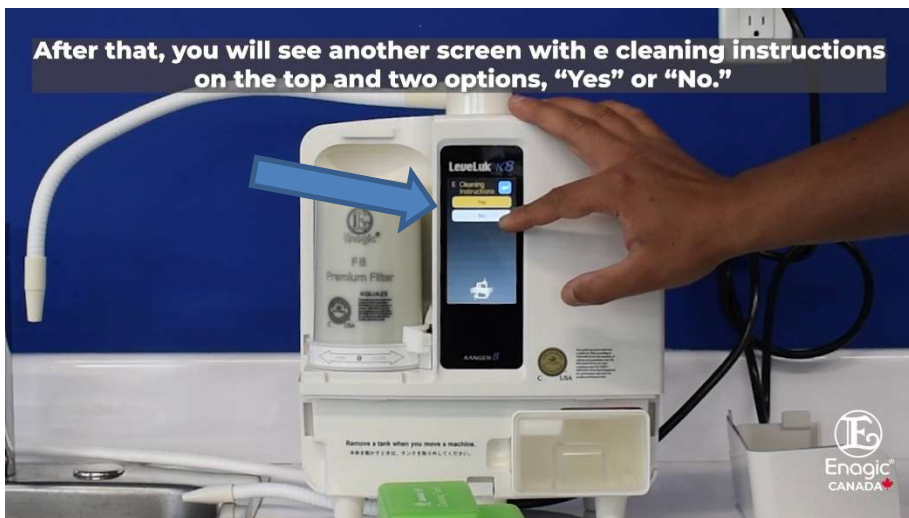

- Click Settings of your K8 Machine at the bottom of the LCD

- Select E-Cleaning

- After That, you will see another screen with E-Cleaning Instructions on Top and Yes or No options.

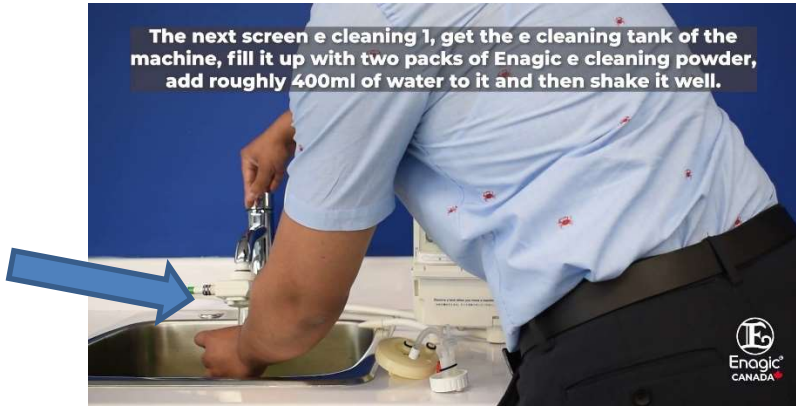

- Please select "Yes" to move the machine to step forward into E-Cleaning

- The next Screen E-Cleaning 1, get the tank of the machine, fill it up with 2 packs of Enagic E-Cleaning powder, add roughly 400ml of water to it then shake it well.

The next screen e cleaning 1, get the e cleaning tank of the machine, fill it up with two packs of Enagic e cleaning powder, add roughly 400ml of water to it and then shake it well.

- On the next step, E-cleaning 2, Insert the tank and place the Cover on it and press okay.

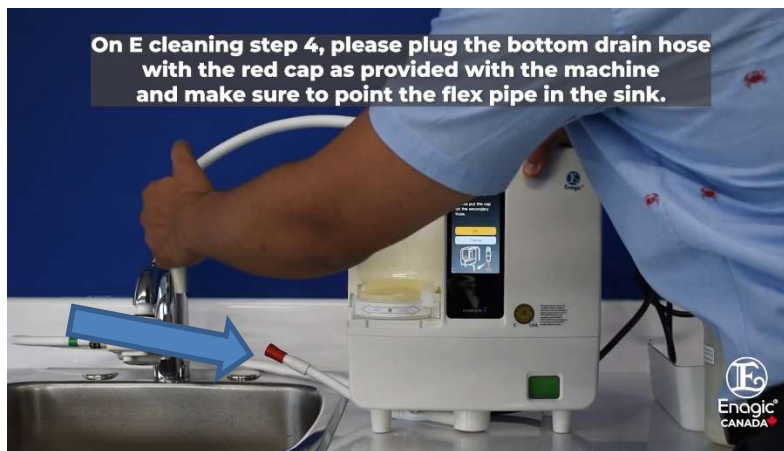

On the next step, E cleaning 2, please insert the tank and place the cover on it and press ok.

- On the 3<sup>rd</sup> Step of E-cleaning, remove the filter from the unit and install the cleaning cartridge in its place and lock it down. Pre okay to move forward.

- On E-Cleaning Step 4, Install Please Plug the Red Acid Discharge Plug as provided with the machine and make sure to point the flex pipe in the sink.

- On Step 5, Press Start to Commence E-Cleaning, the machine will go in a cycle of E-Cleaning for 3 hours which will be step 6

- Once it's done on step 7, please remove the red cap from the secondary hose and press okay.

- On step 8, please remove the cartridge and install the F8 filter and press okay.

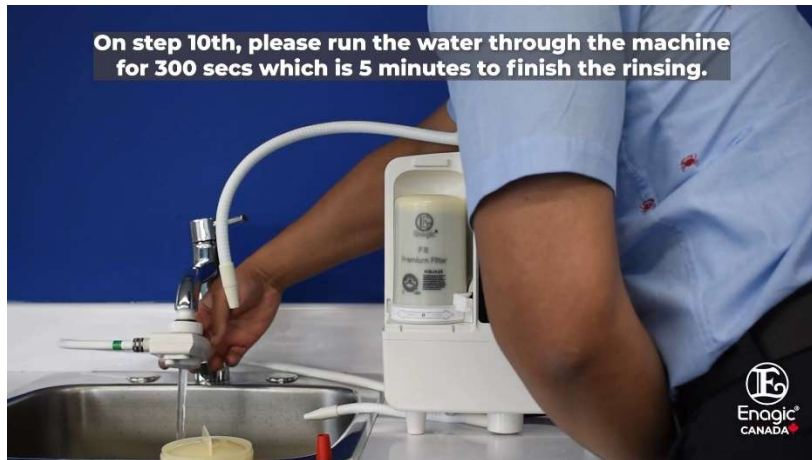

- On the 9<sup>th</sup> Step, remove the cleaning tank from the bottom of the unit and replace with enhancer tank. Press ok.

- On the Step 10, please run the water through the machine for 300 seconds to finish the rinsing.

- E-Cleaning Complete
